Budesonide Irrigation Instructions

1. Fill NeilMed® irrigation bottle with 8oz of Saline solution (top of line is 8 oz). You may use the saline recipe below or buy the NeilMed ® Sinus Rinse packets and follow the directions on the back of the packet.
 2. Add 1 respule of budesonide to the bottle.
 3. Swirl the bottle to mix
 4. Bend your head over the sink and irrigate each nostril with 4 oz (half bottle) of this solution.
 5. Do this procedure twice a day – morning and night
- Rinse out the bottle and wash its tip with soap and water after each use. Air dry completely. Once a week, sterilize the bottle with 2/3 part water and 1/3 part hydrogen peroxide – shake solution and squirt through nozzle making sure solution flows over nozzle tip.

Normal Saline Recipe (1 liter)

1 liter boiled or distilled H₂O (must be sterilized)
1 teaspoon canning/pickling/kosher salt (non-iodized)
1 teaspoon baking soda

To make 1 gallon, quadruple the above recipe

IMPORTANT: If you follow the above recipe, keep this solution in the refrigerator. Microwave to room temperature prior to use.

NOTE: If your budesonide has been ordered through a compounding pharmacy, please refer to the instructions provided with your medication.
